Mark Cedrick Villanueva

B.S. in Information Technology

EDUCATION

B.S. in Information Technology Sep 2021 - May 2025
NJIT - Ying Wu College of Computing - Cum Laude Newark, NJ

INTERNSHIP

UPS Jun 2025 - Aug 2025
ISM Intern - Software Engineer Revenue Systems Parsippany–Troy Hills, New Jersey

Developed analytical tools and visualizations that supported business infrastructure and reduced manual effort.

- Deployed Looker and Google Cloud Run to automate manual touch points, resulting in ~\$15,000 per Month in cost savings in manual effort
- Created 2 scalable projects that can be adopted throughout the organization, that cut task time by 90% and boosted efficiency by 1000%
- Utilized Azure DevOps for task management, created 10 tasks in user stories, and practiced SoD to keep workflow organized and maintained
- Gained enterprise level experience in over 7 cloud technologies and worked closely with the DevOps Lifecycle to manage all projects

Extern Aug 2024 - Sep 2024
Mobalytics Remote Extern Remote

Gained comprehensive understanding of Mobalytics' goals, researched gaming genres, analyzed game mechanics, player psychology, and enhanced strategic insights through firsthand gameplay experience.

- Incorporated myself with the vision, mission, and operations of Mobalytics, resulting in a 100% understanding of company goals
- Researched 4+ gaming genres, identifying key trends and market opportunities, leading to a 15% improvement in strategic recommendations
- Evaluated over 10 different game mechanics, KPIs, revenue models, and player psychology, driving an increase in insights
- Oversaw over 3 specific games to gain firsthand experience, enhancing understanding of player behaviors and genre-specific dynamics

WORK EXPERIENCE

Harbor Freight Tools Aug 2023 - Mar 2024
Sales Associate Iselin, NJ

Enhanced store efficiency at Harbor Freight Tools, through a streamlined processes and improving customer satisfaction with a safe and organized environment.

- Boosted store efficiency and profitability by implementing streamlined processes, resulting in a 15% increase in sales
- Ensured a safe, clean, and organized store environment, enhancing customer satisfaction and retention, resulting in a 10% boost in repeated visits
- Managed inventory and back-end operations, ensuring optimal stock levels and reducing shortages by 20%

KEY SKILLS

Coding • Testing & Debugging • UI Design • Website Development • Game Development • Software Development

Programming Languages: C/C++, C#, Java, SQL, Swift, Lua

Scripting Languages: Python, Node.js, HTML, CSS, JavaScript, PHP

Cloud Administration: Google Cloud Platform, Google Cloud Storage, BigQuery, Looker, Cloud Run

System Administration: Windows (10, 11), Linux (Ubuntu)

Database Administration: MySQL, MSSQL

Project Management: Azure DevOps, DevOps Lifecycle, SDLC, Git, GitHub, GitLab, Jira, Scrum, Agile Development

Markup Languages: JSON, XML

Frameworks and Libraries: Pandas, React + Vite, jQuery, REST API, UI Frameworks

Tools and Software: Visual Studio Code, Unity, Unreal Engine, Godot, Blender, Docker, DockerHub, Cisco Packet Tracer, Microsoft Office, Adobe Creative Cloud, DaVinci Resolve 18, OBS, VRoid Studio, Live 2D, Slack, Outlook, Microsoft Teams, Discord

Human Languages: Fluent in English, Semi-Fluent in Tagalog

ACADEMIC PROJECTS & CONFERENCES

Conferences: 2023 Game Developers Conference | Mar 18, 2024 – Mar 22, 2024

- The Game Developers Conference (GDC) is a five-day event where game development professionals gather to share ideas, tackle challenges, and influence the industry's future.
- As a college IT developer, I had a great opportunity to learn from experienced programmers and game designers, enhancing my skills and expanding my professional network.

Software Package Management | [Routine-Logic](#)

- Designed, developed, and tested an AI-powered package dependency reporting tool that streamlines software maintenance by automatically detecting outdated or vulnerable dependencies and recommending secure, efficient upgrade paths.
- Cuts costs tied to technical debt, delayed upgrades, and security risks while maximizing ROI on developer time through automation dependency research.

User Management | [user management](#)

- Developed and tested features for a user management system, including setting up Docker, Ubuntu, and pgAdmin, fixing QA issues, and implementing new API endpoints. Leveraged GitHub for version control and DockerHub for containerization.
- Created and executed multiple unit tests to verify key functionalities, such as user registration, profile updates, and email notifications, ensuring system reliability and consistent performance.

Adobe Express Add-on | [Moviepunk](#)

- Developed Moviepunk for HackNJIT 2024, a custom Adobe Express add-on, enabling users to upload, manipulate, and integrate images into digital projects seamlessly. Key features include drag-and-drop functionality, image resizing, a progress tracker, and a customizable project checklist to enhance user productivity and creativity.
- Built using HTML, JavaScript, TypeScript, and the Adobe Express Add-On SDK, we leveraged tools like Webpack and GitHub for development and collaboration.

Mental Health | [Serenity](#)

- Developed a mood-tracking web application for HackRU 2024, enabling users to reflect on daily emotions through a simple and organized interface. Features include a functional login system, mood tracker, diary tab, and color-coded calendar for visualizing stress and happiness trends.
- Built entirely on the Bubble platform, leveraging its no-code capabilities to design and implement a fully operational application. The project prioritized simplicity and accessibility.

Public Health | [VitalVoyage](#)

- Developed an online appointment booking platform for HackNJIT 2023 Hackathon, incorporating patient registration, digital/printable medical forms, and an educational game for children to enhance engagement.
- Implemented employee tools including a safety checklist, patient booking calendar, fatigue monitoring system, and inventory management using HTML, JavaScript, and CSS for a responsive and efficient user experience.

Education Website | [DeepEdu](#)

- Developed an innovative website for HackRU 2023 Hackathon, integrating AI and machine learning to create a student tool, enhancing user engagement and functionality.
- Leveraged HTML, JS, and CSS to deliver a responsive and interactive user experience.

Fitness Website & Store | [EnvinoWalk](#)

- Engineered a comprehensive website for HackNJIT 2022 Hackathon, utilizing a built-in database to streamline front-end and back-end operations, improving data management efficiency.
- Applied JavaScript to enhance dynamic content and user interaction with Velo's API.

Additional Projects | [Site](#)

- Projects including Design Documents, Game Designs, and itch.io passion projects.

LEADERSHIP EXPERIENCE & PROFESSIONAL ASSOCIATIONS

Group Leader & Main Programmer | HackNJIT 2022, Newark, NJ

- Led a team at HackNJIT 2022, effectively delegating roles to optimize team performance and achieve project milestones ahead of schedule
- Utilized a database and development tools to create an interactive map and set up store infrastructure leading to bonus points from judges

Junior Instructor | Tiger's Taekwondo, Edison, NJ

- Mentored over 20 students in Taekwondo, successfully leading multiple classes and improving student skills and confidence
- Developed and implemented training programs, resulting in a 30% improvement in student performance and engagement

Member of Professional Associations: IEEE, ACM, IGDA

CERTIFICATION & HONORS

- **Microsoft Office Specialist Certifications:** Word, PowerPoint, and Excel
- **How to Learn Online: For Verizon Skill Forward Learners** | edX, 2024
- **Dean's List** | Fall 2022, Fall 2023, Spring 2024
- **Winner of Best Use of TinyMCE & Velo by Wix** | HackRU 2023; HackNJIT 2022
- **Employee of the Month** | Harbor Freight, October 2023
